These miniature toggles are rugged, highly reliable switches offering positive detent action for safe switching operation. Featuring the unique OTTO snap-action switch mechanism in conjunction with a unique toggle actuator design, the T3 series offers snap-action contact actuation.

High contact pressure and superior wiping action of the OTTO design makes the T3 series an excellent choice for switching loads from logic level up to 5 amps.

Choose sealed one or two pole circuitry, 15/32-32 sealed or 1/4-40 unsealed bushing construction, momentary and/or maintained operation. The $15 / 32-32$ bushing model is also available with lever lockout toggle feature or thumb button actuators.

Molded-in terminals seal the contacts against moisture and solder flux wicking. The front-panel side of 15/32-32 bushing models are sealed against water and other liquids per MIL-DTL-83731.

In addition to the single turret solder terminal specified in MIL-DTL-83731, we also offer two different lengths of pins for printed circuit soldering.
Mounting hardware provided includes two hex nuts, one lockwasher and one keyway washer.

## Features:

- Snap-action contact actuation
- Shorter behind panel depth
- Superior wiping action keeps contacts clean
- Positive tactile response prevents operating errors
- Weighs up to $\mathbf{2 5} \%$ less than competitive products
- More contact/terminal plating choices
- Highly reliable, simpler design, fewer parts
- Black matte finish available. Contact factory.
- RoHS/WEEE/Reach compliant

These toggle switches are rugged, high performance sealed switches designed for use under severe conditions found in heavy equipment, industrial control, marine and appliance applications. They are totally sealed so the switch can withstand direct water spray and submersion, even during operation. They are designed to meet the international submersion specification level IP68S. OTTO's front panel seal is accomplished with an 0 -ring under the bat handle. However, now a secondary visible bushing seal is offered as an option.

T7 toggles are offered in single and double pole configurations. A choice of models are offered to handle power levels to 16 amps , 0.5 HP and low level electronic switching applications.

These toggles feature positive detent action for safe switching operation. In conjunction with the unique OTTO snap-action switch mechanism, the T7 offers non-teasible contact transfer.

High contact pressure and superior contact wiping action of the OTTO design makes the T7 an excellent choice for switching loads from logic level up to 16 amps.

Mounting hardware provided includes two hex nuts, one lockwasher and one keyway washer. An optional panel seal is available, P/N 710196, MIL. P/N M5423/16-01.

## Features:

- Withstands direct water spray
- Submersible to IP68S
- Switches up to 16 amps
- Withstands extreme shock \& vibration
- Positive detent, non-teasible contact transfer
- 2 \& 3-position, momentary \& maintained action
- Choice of terminal styles
- UL recognized \& CSA certified
- RoHS/WEEE/Reach compliant
- Black matte finish available. Contact factory.

## COMMERCIAL \& MIL TOGGLE SWITCHES

## ENVIRONMENTALLY SEALED TOGGLE

The T9 Toggle Switch is an ideal switch for demanding applications. Qualified to MIL-DTL-3950, this high performance switch is a logical choice for use in environments where sealing and resistance to shock and vibration are required. The T9 is particularly suitable for applications in military, offhighway, aviation, commercial and industrial equipment. This compact, environmentally sealed switch is available in single and double pole configurations with a lever lockout option. Circuitry configurations include two or three positions with many combinations of OFF-ON in momentary and maintained action including $\mathrm{ON}-\mathrm{ON}-\mathrm{ON}$.

## Features:

- Qualified to MIL-DTL-3950
- Commercial version is sealed per IP68S
- Lever lockout option available
- UL, CSA \& CE approvals (pending)
- Maintained \& momentary toggle action
- Optional panel seal
- RoHS/WEEE/Reach compliant
- Black matte finish available. Contact factory.

## COMMERCIAL \& MIL TOGGLE SWITCHES

## Double Pole

The TE series is a MIL qualified, snap-action, non-teasible, positive make and break, panel mount toggle switch.

The non-teasible mechanism assures that the switch will actuate and not "hang up" even when actuated very slowly. A fluorosilicone 0 -ring seals the contact area from contaminants such as dust, moisture and sand. All metal components are corrosion resistant and designed to exceed all military requirements.

This environmentally sealed switch is available in single and double pole configurations with $15 / 32$ or $1 / 4-40$ bushings. The TE series is ideal in applications for dry circuit, low level and power switching applications.

## Features:

- Positive action miniature toggle
- Wiping action contacts
- Momentary \& maintained toggle action
- Panel mount
- Solder lug termination
- Single \& double pole
- Sealed per MIL-DTL-8834
- MIL qualified MS90310-211/221/231/271/311

MS90311-211/221/231/271/311
MS24655-211/221/231/271/311
MS24656-211/221/231/271/311/331/341/351

- RoHS/WEEE/Reach compliant
- Black matte finish available. Contact factory.

## TG SERIES

The TG series toggle guards are offered for 2 and 3 -position switches with 15/32-32 threaded bushings and slotted or flat keyways. All models feature spring loaded covers that lock in either the open or closed positions. In the open position the switch actuator operates on all positions freely, in the closed position, the switch actuator is locked in the desired position.
The toggle guard is easily installed on the switch from the front panel with two mounting hex nuts and may be used with an optional panel seal provided with each switch.

## Features:

- MS approved \& OPL'd choices

- Molded plastic cover - multiple color choices
- Bracket: Black painted steel
