

# LTE MIMO ANTENNA

### LOW PROFILE MIMO ANTENNA WITH GPS

The light transit low profile MiMo antenna range has been designed to support the new generation of vehicular LTE routers. The antenna enclosure contains three isolated high performance antenna elements; two ultrawideband elements covering 698-2700MHz support MiMo/diversity at cellular/LTE frequencies and a high performance GPS antenna with an integrated 26dB gain LNA and high quality filtering to combat noise.

The antenna does not require a metalic ground plane, and maintains a high level of performance even when mounted on a non-metalic surface.

#### Typical VSWR cellular / LTE elements\*

 $^{\ast}$  VSWR measured in free space with 4.5m (15') of CS29 cable.

#### Typical Isolation cellular / LTE elements\*

 $^{\ast}$  Isolation measured in free space with 300mm (1') of cable.

# Typical 3D Pattern - Elements 1 & 2

2600MHz

Note: All pattern and gain measurements taken in free space without additional ground plane.
