#### **BMS13-XX** Boeing

Working closely with partnered QPL qualified manufacturers worldwide we offer a comprehensive range of wires and cables, plus associated products for the Defence and Aerospace markets.

Our customer service team includes technical specialists to provide the best customer support possible.

We offer a wide selection of MIL/Aero specification wires and cables, plus custom designed products.

Our experience and knowledge is able to provide you with advice and support on the best product available for your application, whether it is an off the shelf or a bespoke designed cable.

This product guide outlines a selection of our military and aerospace approved wires to the specifications mentioned, it is worth noting that we can supply a very broad range of high performance wire and cable from our key distribution partners, many of which are available from stock.

Performance Wire and Cable Range, includes... Commercial UL/CSA Wire Composite Aerospace Wire Fibre Optic Cable Harsh Environment & SWAMP Wire High Performance Coaxial Cable High Speed Digital and data Cable MIL-Spec Hookup Wire Speciality Cables

In addition to the wire and cable portfolio managed by IS-Rayfast, we can also supply numerous associated market approved and qualified products.

# **SAE AS22759**

#### Extruded Insulation Wire Variations

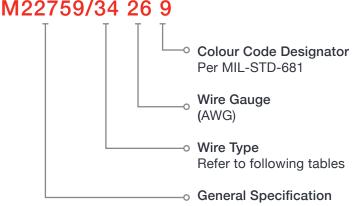

SAE AS22759 wire is a fluoropolymer insulated single conductor wire that is ideal for a wide variety of military aerospace applications. Since AS22759 wire is built to meet military specifications, it is also the premier choice for many commercial applications.

SAE AS22759 wire boasts high performance and reliability in severe wind and moisture prone (SWAMP) zones such as engine nacelles as well as areas that require overload stability, low smoke emission and fire resistance, such as aircraft cabins.

SAE AS22759 wire can carry up to 1000 volts, and is capable of operating in extreme temperature ranges from  $-55^{\circ}$ C to  $+260^{\circ}$ C.

IS-Rayfast offers many different configurations of AS22759 wire. Choose copper or high strength copper alloy conductors coated with tin, silver, or nickel. We also provide a wide selection of insulation material options to meet your needs.

### Part number example

Some of the distinctive characteristics offered by AS22759 wire are:

- · Excellent thermal stability
- · High reliability
- · High break strength and flex life
- · High abrasion resistance
- AS22759 wire is available in sizes ranging from 30 to 0000 AWG.

Note: This specification was formerly listed under MIL-W-22759 and is supplied in full compliance with the SAE AS22759 specification.

Part number example

#### M81044/12 26 9

SAE AS81044 wire is an extremely versatile and reliable stranded single-conductor insulated lead wire with an impressive operating range of -65°C to 150°C and a maximum voltage rating of 600V. This wire offers a resistance to cut-through, abrasion, cold flow and common chemicals, and has low smoke characteristics. This wire is ideal for cable construction, routing in conduits, or in protected areas of avionics and airframe compartments.

Originally developed for military and aerospace applications and is now commonly used in aircraft, ground support equipment, military vehicles, shipboard and missile platforms. This wire offers high density ratios which allow your application to meet strict weight requirements.

There are also various commercial and industry applications for AS81044 like harness wiring or most applications requiring a high density cable.

With conductor coatings including tin and silver, as well as high strength copper alloy,

Note: This specification was formerly listed under MIL-W-81044 and is supplied in full compliance with the SAE AS81044 specification.

# **NEMA WC27500**

Introduction and Colour Code Designation

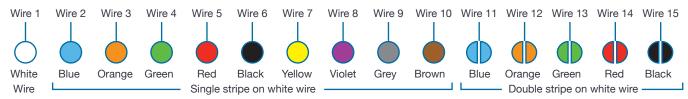

The ANSI/NEMA WC27500 REV A specification is commonly used to describe both shielded and unshielded cable constructions for avionics, aerospace, and airframe applications. The specification allows the user a wide variety of construction choices. Circuit identification, conductor size, insulation type, number of conductors, shielding material and jacket compound may all be specified.

QPL is required for WC27500 in addition to the basic component wires. The producer of the finished cable must be a qualified source under the applicable basic wire specification or must provide evidence that qualified wire was used in the construction of the cable.

The colour identification charts below should be used in conjunction with the part M27500 numbering guide illustrated over the page.

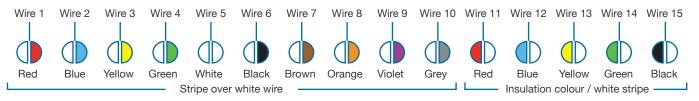

# M27500 Colour Table 3A

For cables having more than 10 conductors, the wires shall be a white base identified by double colour tracers as illustrated in chart below.

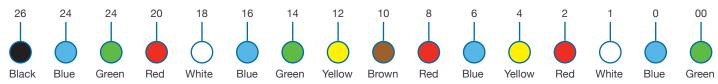

## M27500 Colour Table 3B

For cables having 1-4 and 6-10 wires colour designation is based on stripe over white wire. Whilst wire 5 has no stripe. Wires 11 to 15 colour designation indicates insulation colour with a white stripe.

## M27500 Colour Table 3C - Wire Sizes Identification

Cables colour code identification by AWG size. In accordance with MIL-STD686. For MIL-DTL-81381 basic wire, the insulation colour may be opaque dark yellow or unpigmented polyimide resin colour.

# **NEMA WC27500**

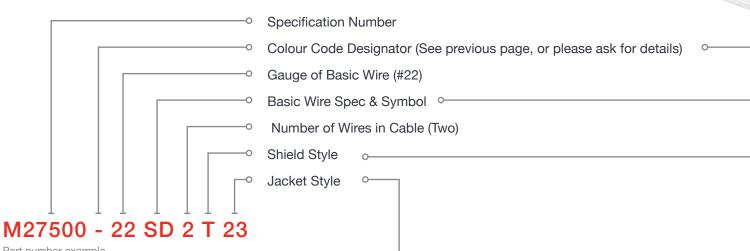

M27500 Part Numbering Guide

M27500 is low voltage, high temperature cable that is ideal for use in a variety of both military and commercial applications, including those involving airframes, avionics and ground support equipment.

Note: This specification was formerly listed under MIL-C-27500 and MIL-DTL-27500.

Because there are so many different construction types available for M27500, users may find it difficult to determine which one is appropriate for their specific application. For help determining this, or for more information on the different types of M27500 cable offered please contact us.

European Standards (ENs) are governed by three European Standardisation Organisations (ESOs): CEN, CENELEC or ETSI. Such standards are recognised as a collaborative effort in technical standardisation per EU Regulation 1025/2012.

For supply chain experience, IS-Rayfast has strategic Mil/Aero franchises with existing international status suppliers and the ability to help design, engineer and supply industry leading products.

IS-Rayfast supplies a variety of EN-compliant hook-up wires for high temperature aerospace applications that are available in single and multicore designs.

Different polyimide/PTFE insulation and jacketing provide excellent resistance to aircraft fluids, chemicals and more. These cables are UV markable and they also have low smoke density and toxicity.

If the specification required is not listed on these pages please contact us as we supply an extensive range of specialist wire and cable.

#### EN2266

Hook up airframe wiring, Polyimide tapes and FEP topcoat, with temperature rating -55°C to +200°C.

#### EN2267

Boeing Spec Wire (BMS 13-\*\*) products are available for the aerospace and military industries. All of our Boeing Spec Wire products are designed and tested to meet Boeing specifications for use in most areas of construction. Whether you are transmitting power, data, or signals.

We offer all types of BMS13 cable available in various configurations and made from the highest quality materials. You can choose conductors made from high strength copper alloy, silver coated, nickel coated, tinplated and more.

Cables can operate in temperatures from  $-65^{\circ}$ C to  $+310^{\circ}$ C, data bus from 50-120 ohms and can carry up to 600 volts. You should choose a design of cable based on the needs and conditions of your specific application.

Please note that we have only illustrated here the two most popular choices of wire. Please contact us for other versions as identified below.

Pi - Polyimide

Working closely with suppliers and manufacturers worldwide we offer a comprehensive range of high performance components and associated products for the Aerospace, Defence, Energy, Industrial, Marine and Motorsport markets. Our experienced internal and external sales teams offers leading customer service and support.

With immediate access to in excess of 8000 product lines from an extensive 'off the shelf' stock profile for next day delivery as standard, along with flexible MOQ's and pack sizes.

We are fully committed to complying with the latest quality approvals for the customers and markets we serve, including ISO9001:2008 and AS9120:2010.
